Reading argument 5

Name: _____ ID: _____

On page 307, the author writes:

> The token sentences were classified into the 10 structural patterns listed below. Eight of these (33a)-(33h), where logical possibilities based on the following criteria:
>
> 1) the position of the NP argument vis-à-vis the verb (i.e., preverbl or postverbal)
> 2) the type of verbal phrase (i.e., the existence or lack of the *be* + *en*); and
> 3) the existence and types of expletive subject (i.e., *there*, *it*, or *pro*)

Question 1 Data collection design A

Regarding Criterion 1, why did the author incorporate differences in NP arguments into the subjects of observation? Briefly explain his reasoning.

Question 2 Data collection design B

Regarding Criterion 2, why did the author incorporate differences in intransitive predicates? Briefly explain his reasoning.

Question 2 Data collection design C

Regarding Criterion 3, why did the author incorporate differences among subjects? Briefly explain his reasoning.
